PropertyQC

Cyclomedia's unmatched imagery and AI technology enables jurisdictions to identify vacant, dilapidated, and abandoned properties—right from your desktop

Cyclomedia's data allows jurisdictions to easily and swiftly identify properties that need immediate attention

- Images offer extremely detailed and clear panoramic views along with highly accurate measurements and location information.
- Industry-leading image resolution allows you to determine the property condition and if code violations are present—right from your desktop, eliminating unnecessary field trips.
- Street Smart open API allows you to integrate all of your Cyclomedia imagery, point clouds, and software functions into systems and applications, including Code Enforcement, Permitting, Tax Assessment and Public Safety.
- Enterprise-level license gives all employees access to your cloud-hosted Cyclomedia database, which enables team collaboration.
- Automated violation identification allows you to efficiently determine remediation options by using data and digital solutions for the benefit of the community's residents and businesses.

Learn how two major US cities utilized Cyclomedia's PQC data for their projects

Louisville, KY

Revitalized vacant and abandoned properties by identifying those on a downward trend and intervening before they became unlivable.

Atlanta, GA

Identified vacant and abandoned properties, which reduced crime and increased the overall livability of the neighborhood.
