

Visualize
a better
world.

Would you like to streamline your Public Works operation? Learn how at PWX!

If you plan on attending this year's APWA PWX event, stop by booth #2235 and speak with Cyclomedia experts to learn more about our Public Works solutions!

Plan to attend Cyclomedia's Speaking Session

August 29 at 12pm

Exhibit Room, Booth 443

Doekele Rienks,
Cyclomedia Director of Product

Technology Solutions Theater Topic:

"Condition Assessment and Change Detection of Roadway Assets using AI and LIDAR"

The session will include a deep dive into how new advancements in software, street level imagery, and more enable a scalable approach to quickly digitize environments and collect complete asset inventories.

Cyclomedia is the leading provider of 360° street level imagery and LiDAR for local governments. Our insights enable organizations to decrease operational cycle time, reduce costs and better serve communities.

These solutions allow Public Works professionals to create, update, and maintain a complete inventory of assets throughout your jurisdiction.

"This session will share insights and real examples of modern AI-powered technologies built to better equip Public Works professionals with actionable data on assets like Pavement, Traffic Signs and Road Markings."

– Connor Burns,
Local Government Sales Executive
